

# ONE PLUS

## Advanced Nitric Oxide Support for Total Body Wellness

ONE PLUS is an advanced nitric oxide support supplement formulated to help promote healthy circulation, vascular function, immune support, and overall body balance. Nitric oxide (NO) is a vital molecule naturally produced in the body that helps relax blood vessels, improve blood flow, support oxygen delivery, and maintain healthy cellular communication. Research shows that nitric oxide plays an important role in vascular health, circulation, endothelial function, and homeostasis.

As we age, nitric oxide production naturally declines due to stress, poor diet, inactivity, environmental toxins, and aging. Reduced nitric oxide levels may affect circulation, energy, cardiovascular performance, and overall wellness. ONE PLUS is designed to support the body's natural nitric oxide pathway and help restore vitality from within.

---

### 1. Vasodilation & Increased Blood Flow

Nitric oxide helps relax and widen blood vessels through a process called vasodilation, allowing oxygen and nutrients to circulate more efficiently throughout the body. Healthy vasodilation supports cardiovascular wellness, healthy blood pressure, and better tissue oxygenation.

#### Supports Conditions Related To:

- Hypertension
- Angina pectoris
- Arteriosclerosis
- Numbness in the hands and feet

By promoting smoother circulation and healthy vascular function, ONE PLUS may help the body maintain better blood flow and overall cardiovascular performance.

---

### 2. Blood Purification & Metabolic Support

Healthy circulation is essential for transporting nutrients, oxygen, hormones, and metabolic waste throughout the body. Nitric oxide supports endothelial health and microcirculation, helping maintain efficient blood flow and detoxification processes.

#### Supports Conditions Related To:

- Diabetes
- Fatigue

- Obesity
- Fatty liver

When circulation improves, the body may function more efficiently, supporting energy production, metabolic balance, and daily vitality.

---

### **3. New Blood Vessel Formation & Cellular Renewal**

Nitric oxide is involved in vascular repair, angiogenesis (the formation of new blood vessels), and tissue oxygenation. Healthy microcirculation is important for healing, recovery, healthy aging, and brain function.

#### **Supports Conditions Related To:**

- Dementia prevention
- Wound healing
- Healthy aging support
- Immune modulation

ONE PLUS helps support healthy circulation to nourish tissues and maintain optimal cellular performance throughout the body.

---

### **4. Immune Restoration & Defense Support**

Nitric oxide is involved in immune signaling and helps the body respond to environmental stressors and harmful substances. It supports communication between immune cells and contributes to the body's natural defense system.

#### **Supports Protection Against:**

- Pathogens
- Harmful substances
- Viruses
- Toxins

A healthy nitric oxide pathway may help the body maintain stronger resilience and immune balance.

---

### **5. Homeostasis Regulation**

Homeostasis is the body's ability to maintain internal balance and stable function. Nitric oxide helps regulate vascular tone, circulation, oxygen delivery, and cellular signaling, which are important for maintaining equilibrium within the body.

### **Supports Regulation Of:**

- Body temperature
- pH balance
- Water balance
- Blood sugar control
- Blood pressure regulation

ONE PLUS supports the body's natural ability to maintain balance, stability, and healthy physiological function.

---

## **Why Choose ONE PLUS?**

**One Plus Nitric oxide produced in your body from fermented vegetables is the **exact same molecule** as the nitric oxide your body naturally makes. Both serve the same critical functions:**

- Supports healthy circulation naturally
- Helps improve oxygen and nutrient delivery
- Promotes cardiovascular wellness
- Supports healthy aging and vitality
- Helps maintain immune balance
- Supports overall body performance and wellness

## **FEEL THE DIFFERENCE**

When blood flows better, the body functions better.

With healthier circulation comes better energy, better recovery, better vitality, and a better quality of life.

## **ONE PLUS**

**Better Flow • Better Energy • Better Health**
